

Mobius Pro 5C Update Process

1. Download the firmware at: http://oyendigital.com/tech/firmware/5C/VL820_Q8_Data_D0_0F03_20220401.zip (Note: The firmware must be updated using Windows. The utility to update the firmware is not compatible with Mac.)
2. Unzip the contents of the downloaded file. Right-click 'VL820_Q8_Data_D0_0F03_20220401.exe' and select Run As Administrator to install the utility.
3. When complete, restart the computer and launch the application. It will be listed in your applications or on your desktop as 'HubFWUpgrade'

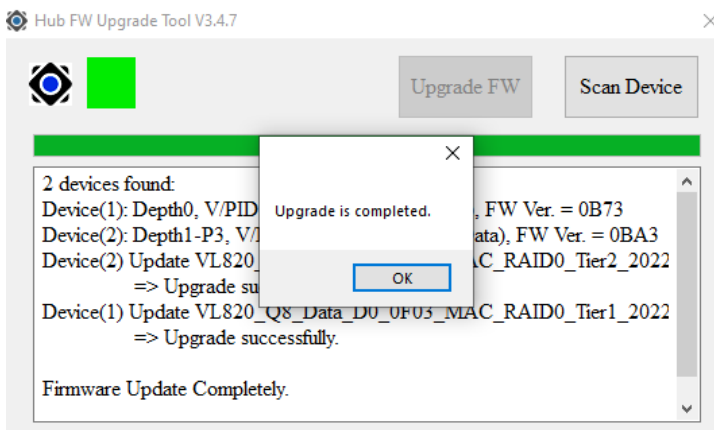

4. Remove the drives and connect the Mobius Pro 5C to the computer. Click 'Scan Device' and the Mobius Pro 5C will appear as 2 devices.

5. Click "Upgrade FW" to start the upgrade process.

6. When the upgrade is successful, the message below will appear:

7. Click OK, disconnect and reconnect the Mobius and the software will show the new FW version : **0F03**. The update is now complete.
