LED indicator:

Off = Power OFF

Solid = Power ON

Flashing = Read/Write Access

(3) Connecting the Helix

Using USB C-C

- Connect the included USB C-C cable to a USB-C or Thunderbolt 3 port on the computer.

Using USB C-A

- Connect the included USB C-A cable to a USB 3.1/3.0 /2.0 port on the computer.

(4) Using the Helix

The drive is pre-formatted as exFAT, which is compatible with Windows and Mac OS. For users who wish to reformat the drive, please visit the links for instructions.

To reformat using Windows:

<http://oyendigital.com/windows-reformat>

To reformat using MAC OS:

<http://oyendigital.com/mac-reformat>

The Helix does not include pre-installed software. For data backup, we recommend the apps within Windows and Mac.

Win 10 <https://support.microsoft.com/en-us/help/17143/windows-10-back-up-your-files>

Mac *Time Machine* - <https://support.apple.com/en-us/HT201250>

Carbon Cloner - www.bombich.com

(5) Disconnecting the Helix

Windows: Close applications that are accessing the drive. Click the “Eject Hardware” (Safely Remove Hardware) icon in the system tray and highlight the drive. Wait for a few seconds until the system prompts “You may safely remove this device.”

MAC: Close applications that are accessing the drive. Drag the external drive to the Trash/Eject icon. After the disk icon has disappeared from the desktop, you may safely disconnect the drive.

(6) Warranty Information

This product includes a four (4) year repair/replacement warranty provided by Oyen Digital. This warranty is non-transferable and is limited to the original purchaser. Warranty service may be requested by completing the form at the following link: www.oyendigital.com/support

For our complete warranty policy, visit: www.oyendigital.com/warranty

(7) FAQ

Q: Is the Helix compatible with Thunderbolt 2 using a Thunderbolt 3 adapter?

A: No, the Helix is not compatible with Thunderbolt 2 using a Thunderbolt 2 to 3 adapter of any make or model.

Q: Is the Helix compatible with TRIM in Windows or Mac?

A: The Helix is enabled to accept TRIM commands. However, Mac OS does not send TRIM commands to USB drives.

Windows: To use TRIM (Optimize) function in Windows, the drive must be reformatted as NTFS. For details, visit:
