## (3) Hard Drive Assembly

a) Remove the rubber bumper from the enclosure by slowly stretching the material over each corner.

b) Remove the screw located at the bottom of the case and slide out the circuit board from the enclosure.
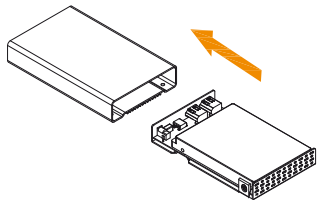

c) Install the hard drive and mount it using the included four mounting screws.
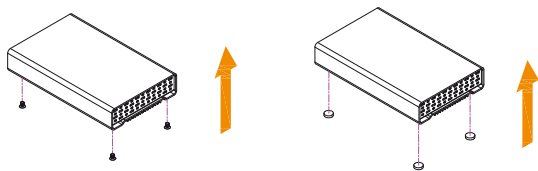

## (4) Hard Drive Assembly (cont.)

d) Slide the assembled drive back into the enclosure.

e) Fasten the 4 screws at the bottom of the housing to finish the assembly.

f) Insert the front end of the Novus into the rubber sleeve. Stretch the rear corners of the bumper around the Novus.

(**Note**: The rounded opening should be on the bottom.)

## (5) System Set Up

If you have installed the drive yourself and this is a brand new drive, you will have to format the drive before it is accessible.

Use Disk Management on the PC or Disk Utility on the Mac to format the drive.
