

## **Mobius Thunderbolt – Fan Removal**

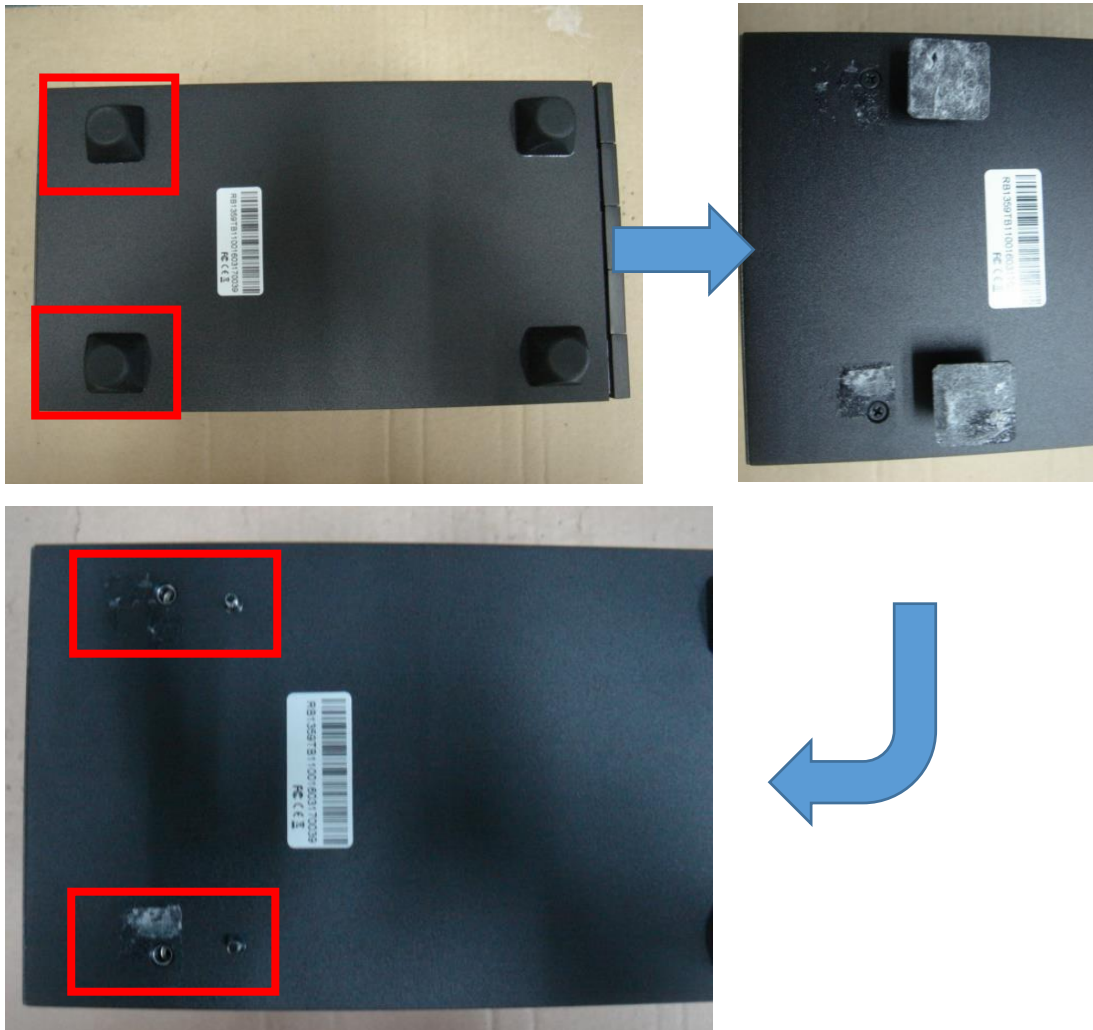

*Note: Electronic components are electrostatic sensitive - meaning they are sensitive to static electricity. Please take precaution when disassembling the Mobius Thunderbolt.*

*Technical Level: Intermediate to Advanced*

1. Remove all HDD Trays

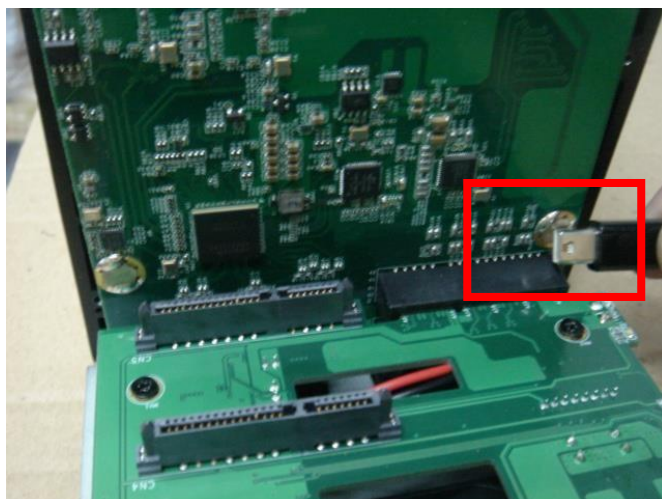

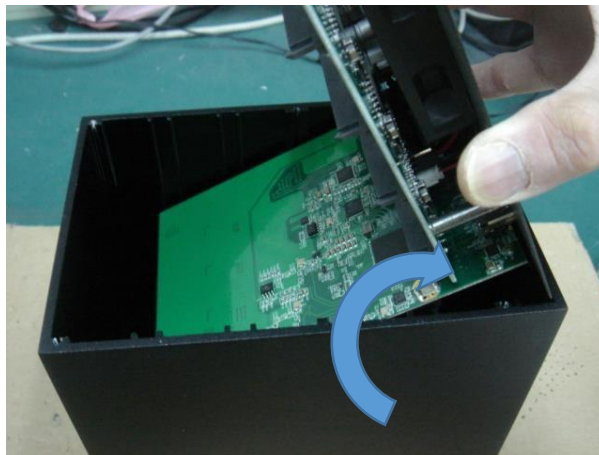

2. Remove the rubber feet.

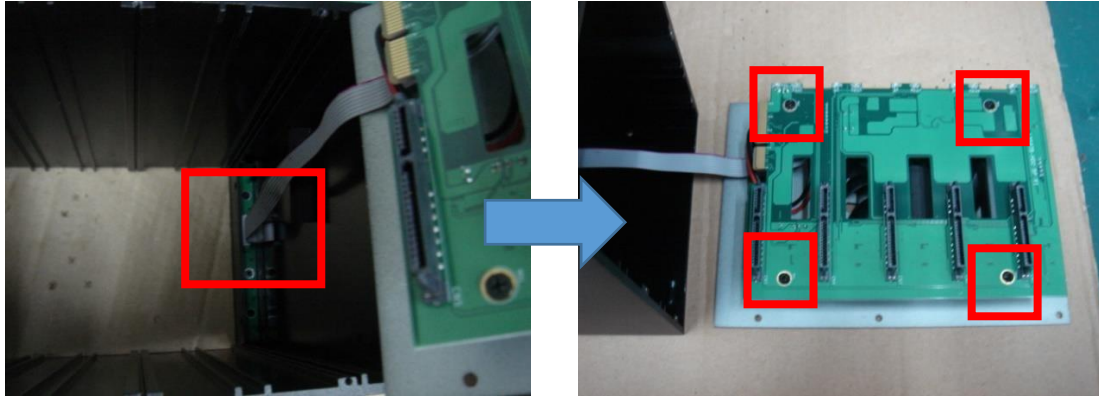

3. Remove the screws on backplane.

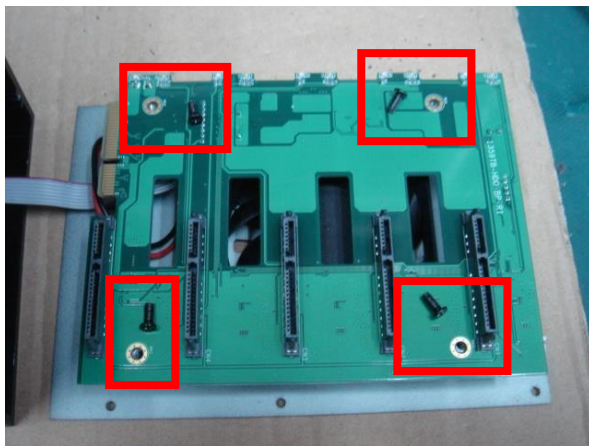

4. Remove the PCBA. Use the thunderbolt cable, connect to the computer and use the other side's metal housing to touch the Mobius connector's metal housing for 2-3 seconds to discharge any remaining electricity.

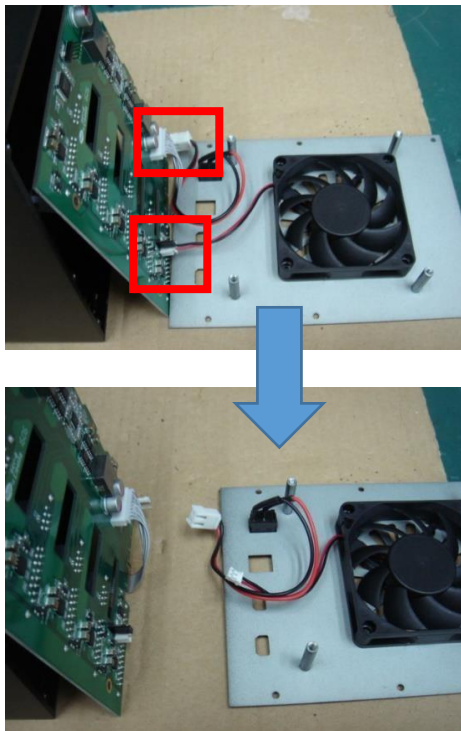

5. Separate the two PCBA's.

6. Remove the screws on back of the PCBA.

7. Unplug the Fan and power cable.

8. Remove the Fan's screws.
